## **Question:**

**How much will it cost to buy and maintain a set of hearing aids?**

## **Answer:**

### **Purchase price**

- range from \$2800 for a set up to \$7600
- life expectancy of a hearing aid is up to 7 years

### **Repairs**

- once the 2 year purchase warranty expires – flat rate charge of \$240 comes with 6 month warranty

### **Batteries**

- once every week or two – approximately a dollar a battery – estimate of about \$100 per year for two hearing aids

### **Accessory items** to limit repairs

- Dri aid kits – reduce moisture/wax related repairs - \$25
- Wax removal solution – limits earwax buildup and wax related repairs - \$9
- forced air blowers - \$10
- cleansing tablets for earmolds - \$6 for a year supply
- Battery testers - \$20 or less

### **Services**

- There is usually a fee for services once your purchase warranty expires—review these fees with your audiologist
